Organized by:

iapri  **ITENE** | **30**TH ANNIVERSARY 1994-2024

**SEE YOU IN
THE FUTURE OF
PACKAGING !**

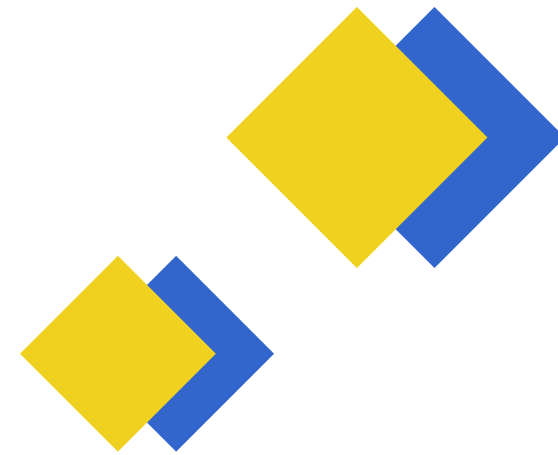

Join the world's leading packaging experts at the most important scientific and business congress in 2024!

ITENE organizes with IAPRI, International Association of Packaging Research Institutes, this worldwide conference where you will be able to:

- Discover the innovations and trends that are transforming the packaging industry
- Present your innovations alongside other global experts
- Make connections and network with leading industry professionals
- Become a sponsor and promote your company to an international audience

The 2024 edition of the IAPRI World Packaging Conference will explore the latest research advances in this field, an event in which ITENE will bring 30 years of experience since in 2024 the research centre will celebrate three decades of activity dedicated to generating scientific-technological knowledge to transfer it to companies through R&D projects, consultancy services, testing and training.

Discover the latest developments and trends!

Nowadays, the packaging industry is currently facing several challenges:

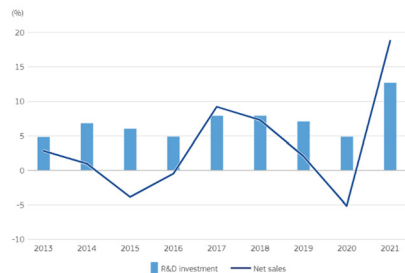

- Compliance with circular economy requirements.
- Needs of current distribution cycles, particularly the increase in online sales and digital transformation.
- New materials and new functionalities
- Safety of people, processes and products

MAIN WORLDWIDE SCIENTIFIC AND TECHNOLOGICAL PACKAGING REPRESENTATIVES

EUROPEAN R&D INVESTMENT

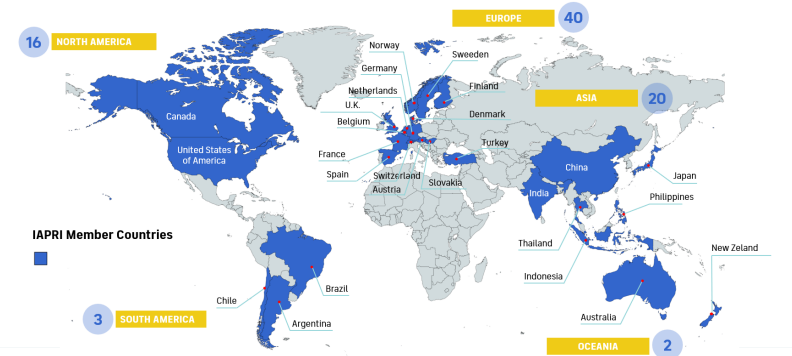

Private R&D investment: In 2021 it recovered strongly (14.8% increase compared to 2020) beyond pre-pandemic crisis levels. It was registered an increase of 8.9% in 2021 by European industry.

A clear trend of the European Commission to increase investment:

- In 2021, the EU spent €328 billion R&D, + 6% than 2020 (€310 billion)
- Under the **Horizon 2020** and **Horizon Europe** programmes, the EU has invested more than €190 million in packaging R&D in 39 projects (2014-2023)

IAPRI MEMBERS

- IAPRI brings together more than **80 centers** from **30 countries**. These are the main scientific and technological organizations around packaging.
- At the **IAPRI World Conference** held in Valencia it will therefore have the presence of the main representatives to tell about new developments and trends.

Meet with leading international packaging experts!

Scientific bodies, innovative companies involved in the manufacture and end-of-life of packaging, as well as companies in which packaging is a key element will attend and present the results of their research.

Let's travel to the future of packaging!

ITENE celebrates its 30th anniversary in the 24th World Packaging Conference

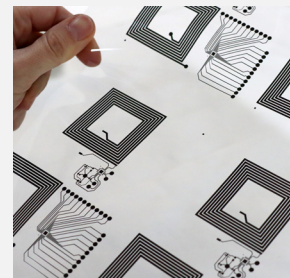

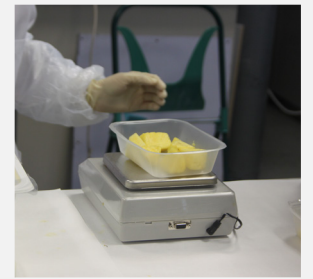

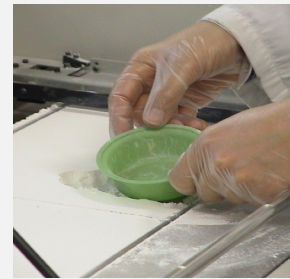

Let's commemorate it together!

As one of the European benchmarks in packaging research, development and innovation, ITENE will celebrate its 30th anniversary in 2024.

During the IAPRI World conference, we will commemorate three decades of activity. Throughout this time, we have been accelerating innovation, research and development with brilliant and committed minds and with state-of-the-art facilities equipped with the best technology.

We work together with the entire packaging, transport and logistics value chain to solve their safety, functionality and sustainability challenges. ITENE generates knowledge and technology with market impact. ITENE research center puts its knowledge and technology at the service of industry through R&D and innovation projects and consultancy, testing and training services.

ITENE has 5,000 m² of laboratories and pilot plants equipped with state-of-the-art technology in its facilities located in the Paterna Technology Park (Valencia, Spain). Moreover, it has an ITENE Community of more than 4,000 companies and 10,000 professionals, it is member of the leading organizations in its field, and it takes an active role in the forums and initiatives it promotes.

The International Association of Packaging Research Institutes supports and advances packaging research and education by facilitating knowledge exchange and collaboration. Starting in 1960 several European packaging research institutes and one from the United States met every two years to discuss common problems in research and testing.

IAPRI was established in 1971 with seven members as an international membership association to promote packaging research and education.

IAPRI is a unique global network which allows organizations to communicate and develop ideas, exchange experiences and in many cases reduce duplication of effort. It was headquartered in the United Kingdom as an unincorporated association until in 2017 the offices were moved to the United States and IAPRI was incorporated as a non-profit association.
