

Technical specification of equipment

File number: 19LIC.007

1. Equipment description

Stretch blow moulding machine for the production of bottles of thermoplastic materials

2. Technical specifications

The equipment must meet the following specifications:

- Manual machine
- Stretch blow device with two blowers
- Rotary infra-red heating device
- Type of product: bottle
- Max. volume of product: 2.5L
- Max. body diameter of product ≥ 135 mm
- Bottle mould with two cavities (1 cavity for 500ml bottle + 1 cavity for 1000ml bottle)
- Security devices for obtaining the CE marking

3. Other features

Positive value will be given to:

- Spare-parts availability for at least 10 years
- Technical support
- Operation training
- Shipment to ITENE's facilities
